Laboratory Approval

Annex
Approval No.: 73931/09

Approved Basis
Laboratory Inspection on 16.04.2009 and email exchange until 27.08.2009

List of approved test methods

| IEC TS 61400-23 | Wind turbine generator systems – Part 23: Full scale structural testing of rotor blades except Sections 8.2.1.3, 8.3.3, 8.5, 10.4 and 12.5 |

Alterations or modifications within the laboratory having substantial influence upon the quality of test results (e.g. alterations in testing equipment) and changes in heading personnel are to be immediately communicated in writing to GL.

Should any inspection reveal any deviations from the basis of the Laboratory Approval, a determined period will be set for the elimination of these deviations and if necessary a subsequent examination will be performed. Should the subsequent inspection establish that the deviations have not been eliminated, GL is entitled to withdraw the Laboratory Approval.

Should GL get knowledge about any serious deficiencies the laboratory is responsible for, GL is entitled to suspend the Laboratory Approval until the deficiencies are remedied or to withdraw the Laboratory Approval.
