

### **SOLAR RADIATION MEASUREMENT, ON DEBATE AT CENER**

**Sarriguren (Navarra), 20 October 2009.**-The main research centres, universities and institutions related to thermal solar energy have met today, Tuesday, at the headquarters of the National Renewable Energy Centre-CENER in Navarra, in order to analyse the possibilities of developing joint solutions that will facilitate the exchange of information and collaboration in R&D matters.

Experts from the State Meteorology Agency (AEMET), CIEMAT, ITC, INTA and the universities of Valladolid, Seville, Jaen and Valencia have participated in the conference, which has focused mainly on solar radiation measurement in Spain.

#### **About CENER**

The National Renewable Energy Centre of Spain is a technology centre, with excellent qualifications and international prestige, specialised in applied research and the development and promotion of renewable energies. CENER has more than 200 researchers, carrying out activities on the five continents. The Board of trustees is comprised of the Ministry of Science and Innovation, the Research Centre for Energy, Environment and Technology (CIEMAT), the Ministry of Industry and the Government of Navarra.

CENER performs its activity in six work areas in the field of energies: wind energy, solar thermal energy and photovoltaic solar energy, biomass, bioclimatic architecture and renewable energy grid integration. Its headquarters are located in the Ciudad de la Innovación (Innovation Centre), in Sarriguren - Navarra, although it has offices in other locations in Spain. It has modern accredited laboratories and facilities in Europe, as is the case of the Wind Turbine Test Laboratory (located in Sangüesa), a biomass laboratory, a thermal collector and photovoltaic module test laboratory, as well as a photovoltaic cell materials and processes laboratory.
