

CENER TAKES PART IN UNED SUMMER COURSES

Sarriguren (Navarre), 27th September 2011.- "The future of energy: economy, strategy and policy" is the title of the summer course organised by the Spanish National University of Distance Education (UNED) in Tudela.

The purpose of the course is to reflect on the existing energy system and analyse possible sources of energy, including renewable ones. The technology and development of renewable energies will be the starting point of the presentation given by the Director of R&D at CENER, Ignacio Martí, who is taking part in the section entitled: "Is the current model sustainable? Renewable vs. fossil fuels".
