

CENER SUPPORTS THE CHILEAN SOCIETY

Sarriguren (Navarra), 1 March 2010.- The Management and the whole team of people who work at the National Renewable Energy Centre wish to offer their condolences and support to the Chilean society for the terrible consequences, especially insofar as the loss of human lives is concerned, caused by the devastating earthquake that took place in Chile last weekend.

The Chilean society and especially the citizens of Concepción, with whom, we at CENER have special bonds, can count on our collaboration during these difficult moments in every aspect where we can be useful to them.
