

THE DIRECTOR GENERAL OF CENER TALKS ABOUT THE POTENTIAL OF R&D IN ENERGY TECHNOLOGIES

Sarriguren (Navarra), 14 September 2010.-This morning, the Director General of CENER, José Javier Armendáriz, took part in a conference entitled "Potential of Spanish R&D&I in the area of energy technologies: supply and demand". The conference was organised by the Spanish Energy Club through their Innovation Think Tank in the Energy Area.

José Javier Armendáriz set out the possibilities of developing and applying the centre's technological infrastructures. Some of them, as is the case of the Wind Turbine Test Laboratory, are an international benchmark in the renewables sector.
